

Dear Arenanet

My name is Brock Ellefson, I saw your listing for a programming internship and am incredibly interested. Guild Wars 2 is a huge part of my life and is actually what got me interested in video game development and computer science in the first place. This company, and Guild Wars 2 are very special to me and I would like to take this opportunity to learn as much as I can under your tutelage and apply what I've learned in school and in my free time to the real world.

This is currently my fourth year studying Computer Science at Montana State University. Despite being an undergraduate, I have demonstrable experience in programming. I am not the next Bill Gates nor Vint Cerf however I am very passionate about computer science, constantly pushing myself to expand my knowledge of coding. I programmed my first 2D game from scratch on Blitz Basic. It was complete with sprites as well as custom-made sounds. Right now I've recently began process of independently developing an indie game on the Unity 3d engine in my spare time.

An old boss of mine Samuel Quick, a network administrator, always thought merging my people skills with my knowledge of programming would be the best course for me. Hopefully you consider me a qualified applicant. Attached is my resume, feel free to contact me via cell phone or email. I look forward to hearing from you.

Thank you for your time,
Brock
