Primary Keys:

Nconst: This uniquely identifies a person

Tconst: This uniquely identifies a film

Econst: This uniquely identifies an episode

Assumptions:

A person must be an actor, director, writer, or a combination.

A film must be either a movie or series, but not both

An episode is only a part of a single series

Design Choices:

In order to reduce redundancy, we made series and movie subclasses of film.

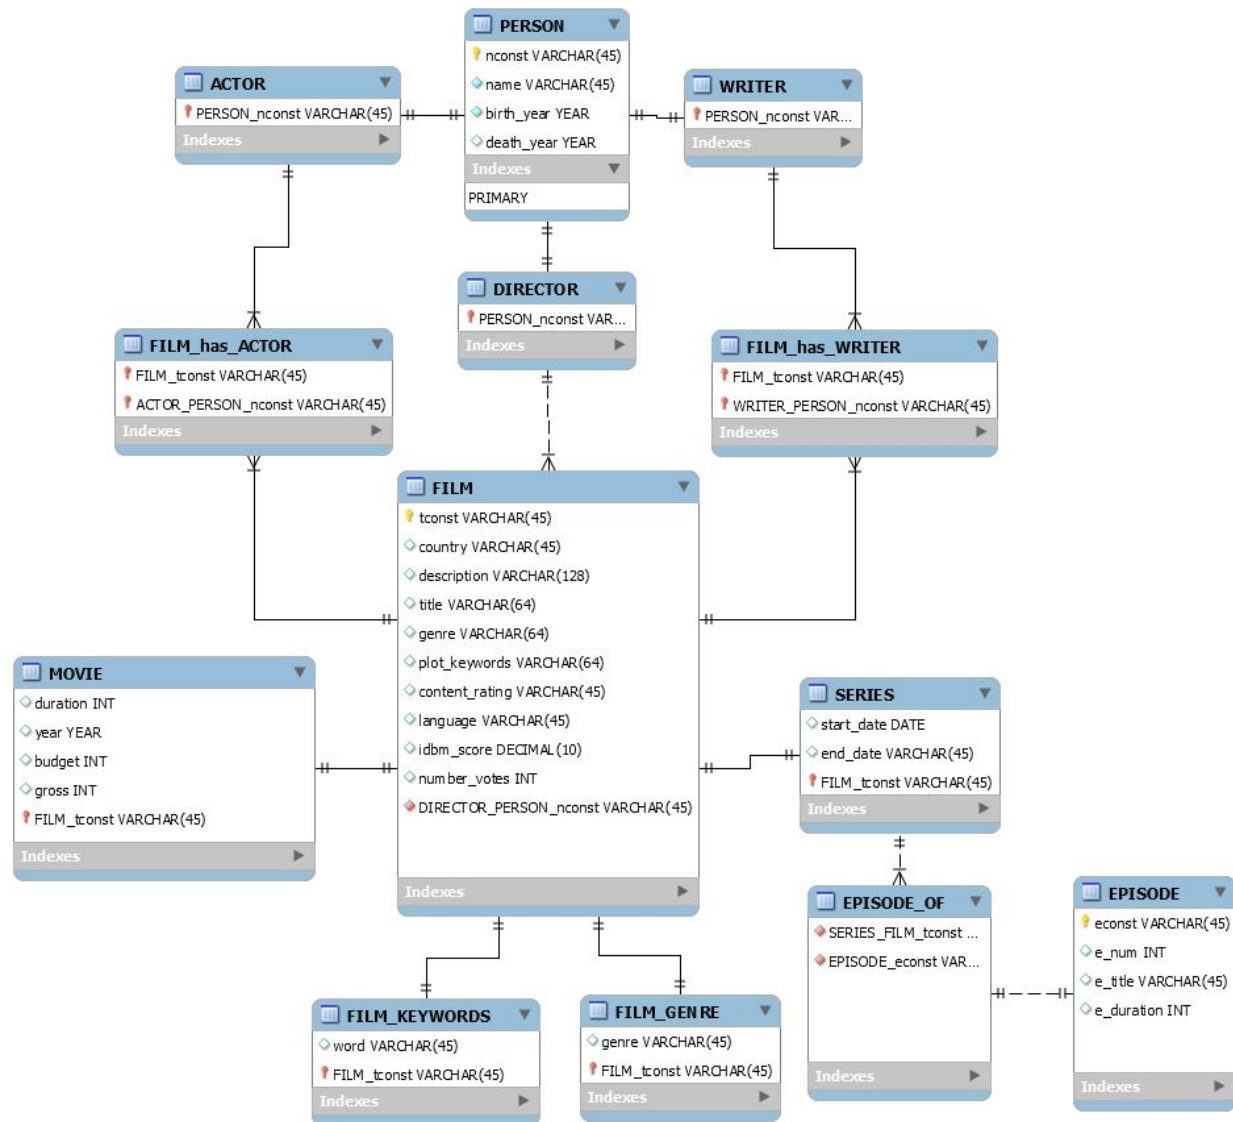

We changed the name of the primary key in episode from tconst to econst to differentiate the primary key in film
